🌐 [my-web](#)

I am a Web developer specializing in the MERN stack and Next.js, with expertise in building responsive and dynamic web applications. Proficient in front-end technologies (HTML, CSS, JavaScript, React, Next) and backend development with Node.js and Express.js, I also have experience with C++, Python, and PHP. My personal and collaborative projects demonstrate my ability to develop scalable and efficient applications using modern frameworks. I am eager to contribute to impactful projects while continuously enhancing my skills in a professional environment.

Skills

- HTML, CSS, JavaScript
- React.js
- Next.js,
- express.js
- Mongo database
- C++ (oop - data structure - algorithms)
- python
- php

Experience

- **Frontend Trainer – Web Master** 2025

Delivered comprehensive training in modern frontend technologies, focusing on React.js and responsive design. Guided students through hands-on projects including e-commerce platforms, landing pages, and website redesigns. Emphasized best practices in UI/UX, code structure, and performance optimization. Demonstrated strong teamwork and communication skills while mentoring learners and collaborating with fellow instructors.
- **Web Developer** 2022 - present
 - E-Commerce Website

Technologies: Next.js, Tailwind CSS, Strapi, Stripe, Clerk
Built a responsive e-commerce website using Next.js for the frontend, Strapi for product management, Stripe for payments, and Clerk for authentication. Designed a dynamic UI with Tailwind CSS for seamless performance across devices.
[GitHub Repository](#)
 - Educational Web Platform

Technologies: Node.js, Express.js, MongoDB, HTML, Tailwind CSS, JavaScript
Developed a full-stack educational web application that allows users to access learning content. Implemented , dynamic content rendering, and responsive UI using Tailwind CSS. Data is managed and stored using MongoDB, with backend logic handled through Express.js and Node.js.
[Link](#)
 - landing page

Technologies: html , css and js
Created an online landing page with features modern and responsive design, ensuring a seamless user experience across devices.

- **Code Expert - AI Training at Outlier** 2024 - 2025

As a Code Expert in AI Training at Outlier, I contribute to developing and refining AI models by providing high-quality coding solutions and insights. My role involves creating, evaluating, and optimizing code snippets across various programming languages to enhance the AI's understanding and problem-solving capabilities. Collaborating closely with a team of professionals, I ensure the accuracy and relevance of coding examples, assist in troubleshooting complex issues, and support the continuous improvement of AI systems. This position allows me to leverage my technical expertise to shape cutting-edge AI technologies.
